OPEN TRENCH INSPECTIONS: FAUNA MANAGEMENT REPORT

As outlined in Section 9-5 of Ministerial Statement 871 for the Christmas Creek Water Management Scheme (CCWMS) – Pilbara Region, Fortescue are required to submit a monthly report outlining the details of open trench fauna management undertaken during the construction phase of any pipelines associated with the project. This report is in line with the details required of Section 9-5 (1 to 5) of MS 871.

Inspections of open trenches associated with construction of pipelines are undertaken on foot and occur twice daily at a minimum, for the following times:

- Morning inspection undertaken no later than three hours after sunrise;
- Afternoon inspection undertaken between the hours of 3:00 pm and 6:00 pm; and
- If backfilling of a trench section is to occur, an inspection of the section is undertaken no more than one hour prior to commencement.

Table 1 displays the monitoring activities undertaken in December 2012 on pipeline section CC13WM017. No fauna were encountered during any of the trench inspections.

Trench inspection types outlined in the table include:

- Open: Fauna inspection conducted during period that trench remains open (twice daily at a minimum).
- Pre-backfill: Fauna inspection of a trench section to be backfilled.

Table 1 Open Trench Fauna Inspections: December 2012

Inspection Type	Date / Time OPENED	Date / Time INSPECTED	Date / Time CLOSED	Fauna cleared	Fauna injuries / mortalities	Action taken
PIPELINE SECTION CC12012						
PRE-BACKFILL	1/12/2012 8:00	1/12/2012 12:00	1/12/2012 12:30	None present	N/A	N/A
